Heathenry is sometimes referred to as religion with homework. There is an enculturation process that should take place when a person returns to his Folkway. To return to the worldview and way of life of our Ancestors, you need to read and study, and start putting what they learn in practice. The problem, of course, is making sure that you get access to the right resources. Most of the information about Heathenry you find online or in books is misleading or simply wrong. Most Heathens will recommend going to your main sources first. They consist of poetic Edda, Edda Prose, Icelandic sagas, Beowulf and other modern source materials. Then there are well-researched secondary sources that can be valuable in fleshing out your understanding. Aside from that, there are tertiary sources such as stories retelling stories in Lore, books of contemporary Heathen poetry, etc. Some of the following books can be read and downloaded for free from the Temple Library here on our website. Some are available in paperback, hardcover, and free downloads at the Heathen Bookstore of our site. Where possible, we have provided links where you can find the books for free. Many other books can be ordered online or at your local bookstore. Over time, we'll add more of these titles available for purchase or free downloads. There are several books on this list that are a real challenge to find but worth searching for. If there is a book here you have looked and searched but can't find, email me on voidpulp@gmail.com and I will try to point you in the right direction. Poetic Edda - It is available in various translations. Larington is the easiest to understand, but one of the least poetic. Hollander's is one of the most poetic, but once hard to understand. Bellow's translation is a fairly fair balance of clarity and poetic sense. Translations of Larington and Hollander are of the same volume, while Bellow's translation is divided into two volumes. Edda Sorry Sturluson's prose - It's also available in various translations. Byock, Faulks, and young translations are all pretty good. Our Trot is the most comprehensive book available about the revived religion of Hitenri, the pre-Christian religion of the German peoples. First published in 1993, but out of print for years, Our Trot is back in print, featuring updates and additions from its original compiler, Kveldulf Gundarsson, and from many other Heathen writers, all edited by acclaimed author Diana L. Paxson. Volume 1 covers the history and knowledge of the Hiten religion, from its deepest roots of the Stone Age to its flowering today, with information about gods, goddesses and other beings who receive the honor and worship, and the ethics of being Heathen. Trot is an organization that brings together people all over the world who worship and honor the old gods and goddesses of the Germanic peoples. There are many different traditions in this religion, including satro, theodism, oneism and others, but we share a deep love for the old gods and goddesses, for our worthy ancestors, and for the values expressed in our myths and histories. We work every day to restore our ancient religion and bring it into the modern world, staying true to our ancient roots. Trot publishes an expanding line of books, as well as the quarterly magazine Idunna. We strive to be a resource for everyone who would like to learn more about our ways.
